

April 17, 2014

To whom it may concern,

I am writing this letter on behalf of Mr. Daniel Chcouri to confirm his tenure at Comigo and recommend his exceptional technological and personal skills.

Daniel Chcouri worked in my company Comigo between June 2013 to March 2014 as a full stack web developer in the Server Department. Comigo is a Smart-TV company, it aims to extend viewing options across all types of handheld devices, providing new personalization and interactive socialization capabilities for TV viewers.

Daniel Chcouri has a unique and deep understanding of web technologies, in particular JavaScript. Among other things, he was in charge of designing and laying the foundations of Comigo's infrastructure that allows third parties to easily develop web-applications that run on our platform. His development helps us to attract companies and private developers to develop applications that enrich our user experience and to open business and partnership opportunities.

With his relentless motivation and his in-depth understanding of technology, Daniel Chcouri would bring a wealth of knowledge and skills to any project he will work on.

Sincerely,

A handwritten signature in blue ink, appearing to be "Dov Moran", with a long horizontal flourish extending to the right.

Dov Moran
Comigo Founder & CEO
